			ART UNIT	PAPER NUMBER
			2632	

DATE MAILED: 09/08/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/696,611	Applicant(s) SAKAI, TOMOYUKI	
	Examiner Samuel J. Walk	Art Unit 2632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 2 and 6-8 is/are rejected.
- 7) ☒ Claim(s) 3-5 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Examiner Note: Priority

1. Examiner agrees with the Applicant that the Schmitt reference (US 2002/0033486) is not proper prior art and thus has been removed from the rejection. It has been confirmed that the priority is claims on patents US 6,834,218 and US 6,529,803 does not entail relied upon subject matter.

Status of Claims

2. In the Amendment filed 06/13/2005, no claims have been added or cancelled; therefore, Claims 1-8 remain pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-2 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okuchi (US 6193398) in view of Halasz (US 5890084).

Art Unit: 2632

In reference to Claim 1, Okuchi discloses a system for automatically adjusting optical axis direction of vehicle headlights wherein claimed vehicle-posture detecting means met by ECU 20; claimed light projection control means met by ECU 20; claimed wheel-speed detecting means met by right-wheel speed sensor 13 and left-wheel speed sensor 14; claimed posture decision means met by ECU 20, see Col. 14 lns 43-60. Okuchi's ECU 20 receives data from wheel speed sensors 13,14 and calculated the pitch angle to determine the optimum headlight projection. Okuchi does not disclose the calculation of centrifugal force using vehicle width and height. However, Halasz teaches of a controller for vehicular safety device wherein pitch and roll calculations are based upon several constants which vary with different makes and models of vehicles such as height, width and weight. Halasz further teaches the values of G forces measured along the X-axis, Y-axis and Z-axis are fed to an output data and/or event-recording device, see Col. 7 lns 48-52 and Fig. 1 (axis coordinates diagram). It is would have been obvious to one having ordinary skill that the G force in the Z-axis is centrifugal force. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Halasz into the system of Okuchi and Schmitt because utilizing

Art Unit: 2632

constants more accurate and precise to the specific automobile being analyzed and monitored would produce more accurate and precise overall results for determining the optimum light projection path.

In reference to Claim 2, see above rejection in reference to Claim 1. In addition, Okuchi discloses that the movable member 34 is driven in the back and forth directions by the actuator 35L (35R) so that the reflector 32 is vertically inclined about the end of the supporting member 33 as a fulcrum only by an actuator driving angle, see Fig. 2 and Col. 5 lns 24-40.

In reference to Claim 6, see above rejection in reference to Claim 1. In addition, since the pitch angle calculation as described by Okuchi and Halasz uses wheel speeds and yaw rates to determine centrifugal force of the traveling vehicle, it would have been obvious to one having ordinary skill in the art at the time the invention was made that the vehicle would be turning because a centrifugal force existed.

In reference to Claim 7, see above rejection in reference to Claim 6. In addition, in mathematics, a positive or negative sign is indicative of direction and therefore would have been obvious to a skilled artisan that the ECU 20 would make a decision based on said sign. Also, Okuchi discloses that the

Art Unit: 2632

optical axes of the right and left headlights 30R and 30L are adjusted. Applicant does not limit the headlight adjustment singularly or separately in a certain direction.

In reference to Claim 8, see above rejection in reference to Claim 7. In addition, it would have been obvious to one having ordinary skill in the art at the time the invention was made that the user and/or manufacturer would set a operational range of light projection so that the headlight would not shine in other drivers' eyes or shine onto the ground limiting the view of the driver.

Allowable Subject Matter

5. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to Claims 1-2 and 6-8 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2632

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel J. Walk whose telephone number is (571) 272-2960. The examiner can normally be reached on M-F: 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
